

Ceiling / Wall lamp
12 W
1860 Lumen
CRI90

Description: A decisive form, resulting from a play of geometries between different materials: glass and aluminium. This integrated LED collection creates indirect diffuse lighting effects. Magnetic temperament: the glass reflector is fixed by a magnet system allowing quick easy installation. The glass, a reminder of local tradition, is used as a reflecting surface diffusing the light softly and uniformly. The gold leaf finish on the glass is hand-done, giving Real the uniqueness and refined elegance typical of a handmade product.

Plus: Magnetic temperament: the glass reflector is fixed by a magnet system allowing quick easy installation. The soft lines become a furnishing element, giving the room personality, whether classic or contemporary. The two aluminium elements are obtained from one single aluminium sheet, laser cut and shaped according to an inverse geometry design. The glass, a reminder of local tradition, is used as a reflecting surface diffusing the light softly and uniformly.
