

Ceiling lamp
35 W
3850 Lumen
CRI90

Description: Intersecting circular elements suspended in space: the structure is made of aluminium with transparent Plexiglas (PMMA) reflector featuring stippled pattern for greater light diffusion. With the light off, its structure blends into the surroundings, becoming an aerial sculpture. When on, it becomes the undisputed star. To perfect the luminosity of the PMMA material, each piece is hand-polished, and the edge is satin-finished for a soft light effect around the perimeter.

Plus: With the light off, its structure blends into the surroundings, becoming an aerial sculpture. When on, it becomes the undisputed star. The light takes shape, highlighted by a slim minimalist design. To perfect the luminosity of the PMMA material, each piece is hand-polished, and the edge is satin-finished for a soft light effect around the perimeter.
