

Ceiling lamp
17,3 W
2500 Lumen
CRI90

Description: Lightness, simple shapes and careful combination of materials. A silent presence that reveals a lively personality when switched on. The two types of LED light (diffuse and directional) combine to create a uniform lighting effect. The design has a metal core and Plexiglas (PMMA) structure with stippled pattern for greater light diffusion. To perfect the luminosity of the PMMA material, each piece is hand-polished, and the edge is satin-finished for a soft light effect around the perimeter.

Plus: The lighting consists of built-in LEDs with dimmable driver (cut-phase) included in the structure. The art. 03407 is part of Air collection that includes different sizes of wall lamps, ceiling lamps and suspensions.
