

Ceiling lamp
12 W
1650 Lumen
CRI90

Description: Gaia ceiling lamp is a product with a green vocation: integrated LED efficiency, recyclable materials, long life cycle. Led and driver are easily replaceable in the place of installation. Lightweight and strong, with aluminium body. The light is shaped by the 3D laser cuts, enhancing its form. The interplay between solids and voids creates a dynamic atmosphere with interesting lighting effects. The finishes in catalogue are 3: bronze, titanium and white. The bronze finish is the result of 3 colour passes to create the two-colour effect with the gold interior and bronze exterior. The titanium and white finishes have the same color inside and outside. It is possible to request the customization of the finish.

Plus: A product with a green vocation: integrated LED efficiency, recyclable materials, long life cycle. Lightweight and strong, with aluminium body. The light is shaped by the 3D laser cuts, enhancing its form. The bronze finish is the result of 3 colour passes to create the two-colour effect with the gold interior and bronze exterior. This process is carried out by hand, making each product unique.
