

Ceiling/Wall lamp  
6 W  
880 Lumen  
CRI90

**Description:** The name refers not only due to the shape of this light but also to its lighting performance. A collection of adjustable ceiling and wall spotlights that allow you to direct the light exactly where needed. Each light is provided with a joint for 360° rotation and 90° movement.

**Plus:** Piston transforms light into volume, creating cones of light to highlight individual objects. The light cuts through space following the direction of the spot in a play of chiaroscuro volumes. Attention to detail can be seen in the steel and French gold finishes, with the metal brushing done 100% by hand. Craftsmanship that makes each product unique.
