

Ceiling lamp
21 W
2850 Lumen
CRI90

Description: Music often helps thoughts to roam free, so as to transform an object talking by chords, the plectrum, into a lamp collection. A rounded and well-balanced shape fitting harmoniously into the surrounding environment. The light reflects on the satin glass, lighting the room homogeneously and an embracing way. A minimal line enhancing ceilings and the depth of the spaces through its diffuse light.

Plus: The glass, recalling the tradition of our territory, is used as a reflective surface enabling the light diffusion homogeneously and in a soft way. The built-in LED has been designed by the LED Change system, it can be replaced with a special spare kit. The driver is phase cut dimmable. The recyclable aluminum of the structure and the replaceable built-in LED make it a sustainable lamp.
